6

Water your plants at dusk or early morning to prevent the water from evaporating

Boil food in as little water as possible

Run your washing machine and dishwasher when they're full and on eco and fast settings

Check for leaks roughly 37% of water is lost from leaks from urban supply systems

Drink tap water this uses less energy and water than bottled water

Reduce food waste we use most water indirectly through what we eat and through what we buy during its production

Take a shower for 5 minutes or less saves up to 70%!

Use a bucket of water instead of a hose pipe to wash your car

Ask a parent to reduce water pressure

Have a shower not a bath

Ask your parents to use the washing machine only when it is full

Save rainwater to water your gardens water butts are great!

Use a water can not hosepipes in the garden

Don't leave on running water while doing activities

Dripping wastes water
